Universal Mfg Co. wholly owned subsidiary, UMC ReTech Announces New Business Growth

Lincoln, NE – March 9, 2017 – UMC ReTech, a subsidiary of Universal Manufacturing Company (OTCMKTS:UFMG), announced today it has been awarded new forward contracts in its brake caliper and fuel pump segments. An aftermarket company focused on transforming remanufacturing by integrating problem solving solutions, UMC ReTech expects significant growth within these segments for the balance of FY2017 as a result of this additional revenue.

UMC ReTech has rich tradition in aftermarket, bringing quality and competitively-priced remanufactured products to market for over half a century. “Our strategic brake caliper customer has enabled growth and paved direction within the caliper segment,” said Ken Kraus, Director of Sales. “Last year they offered us the opportunity to assume production of SKUs that had been warranty concerns for other suppliers. We were able to cut their warranty rates in half on those units. Prior year warranty reduction and on time fill performance were solid contributing factor to this year’s forecasted growth.”

About UMC ReTech

UMC ReTech® a division of Universal Mfg. Co. is a leading supplier of OEM quality remanufactured and new aftermarket products. Founded in 1946, they have invested more than seventy years in engineering problem solving solutions for aftermarket drivetrain, brake and fuel systems from their USA based ISO9001:2008 facility.

UMC ReTech® is the remanufacturer of ReTech® branded transfer cases, transfer case motors, and brake calipers, has recently expanded its drivetrain category to include remanufactured front differential assemblies, power transfer units (PTU) and axle disconnects.

UMC ReTech® is the first manufacturer to offer hybrid problem solving products that marry aftermarket solutions to OE quality remanufactured products, applying aftermarket strategies to inherent OEM issues. For more information, please visit www.umcretech.com.
